

**WE CARE
ABOUT THE
PLANET**

Ingeo bioplastic, an ingenious material made from plants, not oil – reduce dependence on fossil resources

Producing Ingeo emits 75% less CO2 emissions than conventional plastic

Carbon neutral product

BIOCUPS IN LANDFILL

Many companies claim their cups biodegrade in landfill. Products that biodegrade in landfill conditions release methane, a greenhouse gas 84 times more potent than CO2.

Clear BioCups will not biodegrade in a landfill. The CO2 sequestered during the growth of the corn used to make Ingeo PLA remains locked in the material.

BENEFITS = RAPIDLY RENEWABLE RESOURCE | BPA FREE
